

# D.N.P. PROJECT

All students are required to complete a D.N.P. project. All D.N.P. projects must be evidence-based in accordance with the specific program requirements. For the Leadership Program, projects may comprise executive leadership practice, systems/organizational practice, safety/quality organizational projects, and community-based and healthcare policy initiatives. For the Clinical Program, projects may comprise clinical guideline development, clinical practice innovation projects, safety/quality clinical practice projects, or clinical policy and protocol change. The student will implement the evidence-based D.N.P. project in a final-year immersion experience.
