MASTER'S-LEVEL OUTCOMES

Upon completion of the Master of Science in Nursing Program, graduates will have the requisite skills and knowledge to accomplish the following:

CLINICAL PRACTICE

- Provide evidence-based care integrating holistic perspectives and ethical factors at the advanced practice level specific to the specialty area.
 - Employ appropriate methods/strategies/technologies to gather relevant data from multiple sources.
 - · Analyze and synthesize data to identify and prioritize problems.
 - Develop and implement management plans using best available evidence, and evaluate outcomes and modify management plans accordingly.
- 2. Engage in scholarship.
- 3. Critically evaluate clinical evidence from multiple sources (such as current literature, clinical, and patient) to derive implications for best practices.
- Identify clinical challenges and gaps in knowledge, and participate in scholarship to improve health care.
- 5. Apply clinical scholarship to improve outcomes in health care.

SCHOLARSHIP

- 1. Engage in scholarship.
- Critically evaluate clinical evidence from multiple sources (such as current literature, clinical, and patient) to derive implications for best practices.
- Identify clinical challenges and gaps in knowledge, and participate in scholarship to improve health care.
- 4. Apply clinical scholarship to improve outcomes in health care.

LEADERSHIP

- Provide professional advanced practice nursing/midwifery leadership to improve patient outcomes and shape health care systems.
- Demonstrate professionalism and integrity in interactions with patients, colleagues, and systems.
- 3. Collaborate with colleagues and patients to improve access to and quality of health
- 4. Act as a catalyst for assuring access to timely, quality health care for all people irrespective of race, ethnicity, gender, or social status.
